Fig. 2b

FIG. 2c is a side view of the device 100 in a closed position. The device 100 includes a main body 2 and a handle 7. The handle 7 is connected to the main body 2 via a hinge 12. The handle 7 is shown in a closed position, where it is aligned with the main body 2. The handle 7 includes a grip 14 and a release button 10. The release button 10 is located at the bottom of the handle 7. The main body 2 includes a top edge 2b. The device 100 is shown in a side view, with the handle 7 and the main body 2 being the primary components. The device 100 is shown in a closed position, where the handle 7 is aligned with the main body 2. The device 100 is shown in a side view, with the handle 7 and the main body 2 being the primary components. The device 100 is shown in a closed position, where the handle 7 is aligned with the main body 2.

FIG. 3b is a perspective view of the device 100 in an open position. The device 100 includes a first panel 2 and a second panel 30. The first panel 2 is connected to the second panel 30 by a hinge assembly 14. The hinge assembly 14 includes a first hinge member 12 and a second hinge member 13. The first hinge member 12 is connected to the first panel 2 and the second hinge member 13 is connected to the second panel 30. The first hinge member 12 includes a first arm 12a and a second arm 12b. The second hinge member 13 includes a third arm 13a and a fourth arm 13b. The first arm 12a is connected to the first panel 2 and the third arm 13a is connected to the second panel 30. The second arm 12b is connected to the first panel 2 and the fourth arm 13b is connected to the second panel 30. The first arm 12a and the third arm 13a are connected by a first hinge pin 12c. The second arm 12b and the fourth arm 13b are connected by a second hinge pin 12d. The first panel 2 is shown in a closed position and the second panel 30 is shown in an open position. An arrow 3 indicates the direction of movement of the second panel 30.

Fig. 3b

FIG. 3C is a perspective view of the device 10 in a closed position. The device 10 includes a main body 2 and a cover 30. The main body 2 has a front surface 2a and a rear surface 2b. The cover 30 is hinged to the main body 2 at the top edge. The hinge 14 includes a spring 31. The device 10 also includes a latch 7 and a lock 10.
